ABOUT

I am a front-end developer passionate about the web and specialized in modern frameworks, in which I have 7 years of experience. I have created SaaS applications in Vue.js, Nuxt, Angular, and Ruby on Rails, while having a solid engineering background. I enjoy learning new technologies, taking on challenges, and sharing my knowledge with others.

PROFESSIONAL EXPERIENCES

- 2024 - now

Senior front-end developer [Exotec]

- Development of web apps design for the supervision of robotic systems in logistics warehouses (real-time, 3D)
 - Use of modern AI tools to improve development productivity and code quality
 - Animation of the company's front-end community and mentoring of junior developers
 - Creation and maintenance of an internal Design System
 - Working in an agile methodology
- 2020 - 2023

Lead front-end developer [TalentView, acquired by Kelio]

- Design, development, and maintenance of the Kelio ATS (SaaS application for managing job applications)
 - Project management for the front-end framework switch across multiple applications (AngularJS → Vue.js)
 - Working in an agile methodology. Collaboration with other teams (back-end, product, UX/UI) and external partners
 - Development of a Vue.js component library and a Google Chrome extension
- 2019 - 2020

Studies and development engineer [Adaming]

- Development on the checkout application for Leroy Merlin and Bricoman stores
 - Incident resolution
- 2013 - 2018

PhD thesis and engineering internships [CEA]

- Development of a physical modeling application for the behavior of plasmas in fusion machines (tokamaks)
 - Data analysis and image processing from tokamak camera feeds

FORMATION

- 2019 - 2020

JS/Java/Big Data Training [INTI Formation]

Training on modern web development technologies
- 2011 - 2015

Engineering Degree [Centrale Lyon]

General engineering degree
- 2006 - 2011

Scientific Baccalaureate - CPGE [Lycée Faidherbe]

High honors - Star class
