ABOUT

I am a front-end developer passionate about the web, specializing in modern frameworks with 8 years of professional front-end experience. I have built SaaS applications using Vue.js, Nuxt, Angular, and Ruby on Rails, backed by a solid engineering background. I enjoy solving complex technical challenges, exploring new technologies, and sharing knowledge with engineering teams.

PROFESSIONAL EXPERIENCE

- 2024 - Present

Senior Front-End Developer [Exotec]

- Development of web applications for supervising robotic systems in logistics warehouses (real-time, 3D)
 - Adoption of modern AI tools to improve developer productivity and code quality
 - Leading the company's front-end community and mentoring junior developers
 - Creation and maintenance of an internal design system
 - Development within an Agile environment
- 2020 - 2023

Lead Front-End Developer [TalentView, acquired by Kelio]

- Design, development, and maintenance of the Kelio ATS (SaaS application for managing job applications)
 - Leading the migration from AngularJS to Vue.js across multiple applications
 - Working with Agile methodologies and collaborating with other teams (back-end, product, UX/UI) and external partners
 - Development of a Vue.js component library and a Chrome extension
- 2019 - 2020

Software Development Engineer [Adaming]

- Development of checkout applications for Leroy Merlin and Bricoman stores
 - Incident resolution
- 2013 - 2018

PhD Thesis and Engineering Internships [CEA]

- Development of a physical modeling application for plasma behavior in fusion machines (tokamaks)
 - Data analysis and image processing from tokamak camera feeds

EDUCATION

- 2019 - 2020

JS/Java/Big Data Training [INTI Formation]

Training in modern web development technologies
- 2011 - 2015

Engineering Degree [Centrale Lyon]

General engineering program
- 2006 - 2011

Baccalaureate and Preparatory Classes [Lycée Faidherbe]

- Scientific Baccalaureate with High honors
 - Selective Engineering Preparatory Classes
